White pepper processing and automation

1. Remarkably, **DK has the first Rainforest Alliance certification in the world for steam-processed white pepper facility.**
2. Our white pepper peeling technology uses only about one-tenth of the water required by conventional methods.
In addition, process water is recovered through an evaporation and condensation system and recirculated back into production. This closed-loop system **eliminates wastewater discharge and significantly reduces the environmental footprint of the process.**

White pepper processing plant: The processing system is highly automated, covering key stages from steam sterilization, drying, and grinding (cracked & ground) to the packaging section, ensuring the consistent delivery of premium-quality spices product.

DK's white pepper standouts

01

Steam washed

Controlled steam reduces off-odors, microbial risks, and discoloration

02

Minimal impact

Recycled and minimal environmental waste/contaminant

03

Guaranteed quality

Full control of white pepper quality

Fully automated from the steam sterilization, drying, grinding (Cracked & ground) to the packaging section

Rainforest Alliance – Certified Pepper Project in Daklak

RA project overview

Vietnam's pioneer in RA-certified black pepper (2020 Standard)

- Project Growth (2020–2026)
 - 216 to 406 **certified farmers**
 - **Certified area** from 354 ha to 586 ha
 - **Certified volume** from 850 MT to over 1,300 MT annually
- **What This Means for Our Partners**
 - Stable and scalable certified supply
 - Strict control of plant protection products
 - 100% traceable down to farm level

RA Project: Objectives & Key Outcomes

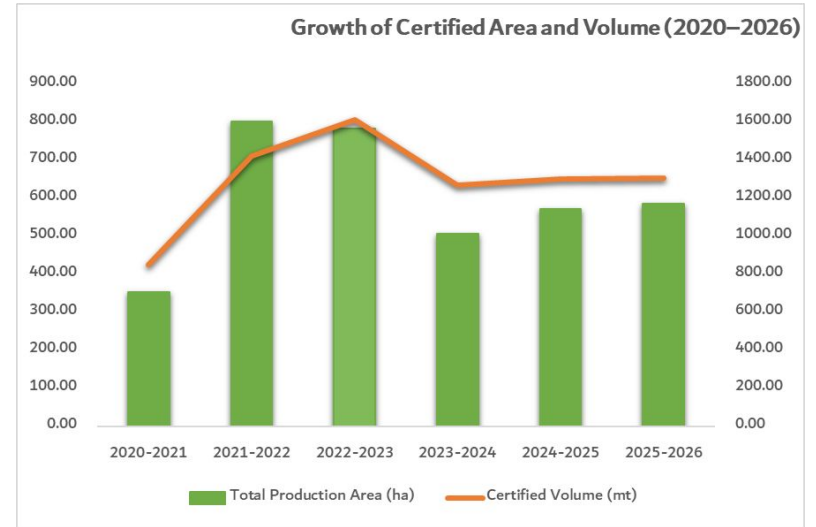

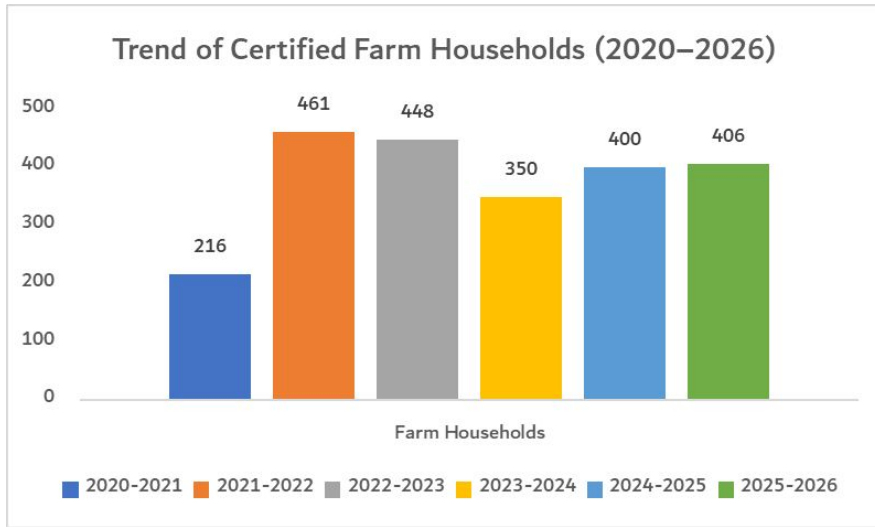

Project Objectives

- Enhance farmers' livelihoods and social responsibility
- Implement sustainable agricultural practices
- Strengthen management and traceability systems

Key Outcomes of the RA Project

- Sustainable and high-quality certified raw materials
- Strict control and responsible use of plant protection products (PRs)
- Reduced environmental and occupational health risks
- Protection of forests and natural ecosystems
- Improved soil health and farm resilience
- 100% traceable certified production
- Continuous monitoring, risk assessment, and improvement plans implemented annually

RA growth metrics

Traceability

100% traceability

- **Strictly controlled and monitored network:** Full traceability down to individual farm households
- **Risk control at source:** Raw materials sourced exclusively from registered and certified farmers under internal control system (ICS)
- **Strict control of plant protection products (PRs):** Farmers trained in responsible pesticide application, labor safety, and environmental protection.
 - Regular residue analysis conducted on incoming raw materials.
- **Continuous monitoring & improvement:** Annual internal inspections, risk assessments, and corrective action plans to enhance compliance and sustainability performance.

Ongoing Training & Farmer Development

- 1. Proactive technical leadership:** Actively provides on-site technical support, hands-on training, and continuous guidance to farmers
 - Ensure proper crop management and full implementation of sustainable farming practices
- 2. Continuous supervision and field monitoring:** Regular farm visits, compliance checks, and timely technical recommendations
 - Improve productivity, risk control, and sustainability performance.

Gender equality

- **Zero tolerance** on gender based discrimination
- **Women empowerment:** Supports women in building confidence, capability and decision making power
 - Free from societal / workplace gender based constraints

Green Energy

Aware of the recent environment conditions, DK decided to use alternate energy at DK's factories to help prevent global warming, acid rain or smog as well as help reduce greenhouse gas (GHG) emissions. We have shifted into solar power.

60% of alternate energy created has been used for all activities in factories and the balance 40% is for resale to power grids.
